

HOME NETWORKING SOLUTIONS

What is **Clipsal** **StarServe®?**

Imagine being able to watch your **DVD player**,
video or **pay TV decoder** in every room of
your home.

You even have the ability to **remotely control**
your **audio visual equipment** from other
rooms to change channels, fast forward,
rewind or pause.

Clipsal StarServe® unlocks your entertainment
centre so now **everyone can watch what**
they want, when they want, where they
want to watch it.

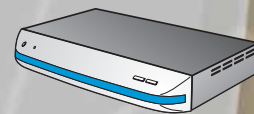

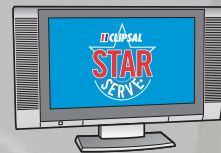

Video distribution

Clipsal StarServe® allows you to watch all of your audio visual equipment from any TV connected to **Clipsal StarServe®**:

- free to air TV (all channels)
- pay TV decoder
- DVD player
- video player
- personal video recorder
- surveillance cameras.

Telephone and Internet connections

Clipsal StarServe® enables the connection of up to four different telephone lines and distributes each line to four different locations.

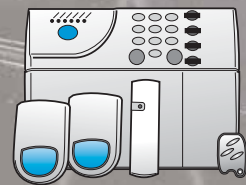

Internet connections can be made easily for both wired and wireless Internet services.

Security interface

Clipsal StarServe® has the option of connecting a security system alarm dialler to the telephone network.

Surveillance cameras

The doorbell rings late at night and you are not expecting visitors. Click onto the **surveillance camera channel** and see who it is without getting out of your seat.

A camera overlooking the pool means you can keep an eye on the kids while they are playing. This is a great feature for families with young children or elderly family members.

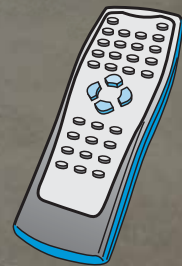

Infra red remote control

This is by far the most sought after feature of **Clipsal StarServe®**. The ability to remotely control audio visual equipment from other rooms of your home.

It is just like having a main entertainment area everywhere in your home.

Clipsal StarServe® remote control ability uses the existing cabling you already have. No separate cabling is required for this function.

This cuts down your cabling costs and makes **Clipsal StarServe®** the logical choice.

When to **install**

If you are building a new home then now is the best time to install **Clipsal StarServe®**.

The cost of cabling a new home is inexpensive compared to trying to retrofit in an established home. It is well worth the effort to install all the cabling you are going to need while you are building.

A small investment now will save you time and money trying to install cabling in the future.

Set and **forget**

The **Clipsal StarServe®** has been designed with simplicity in mind.

Once installed, set it, and forget it is even there.

You will not have to do a thing when you change over to digital TV, as **Clipsal StarServe®** is digital TV ready.

You will wonder how you ever did without a **Clipsal StarServe®** system.

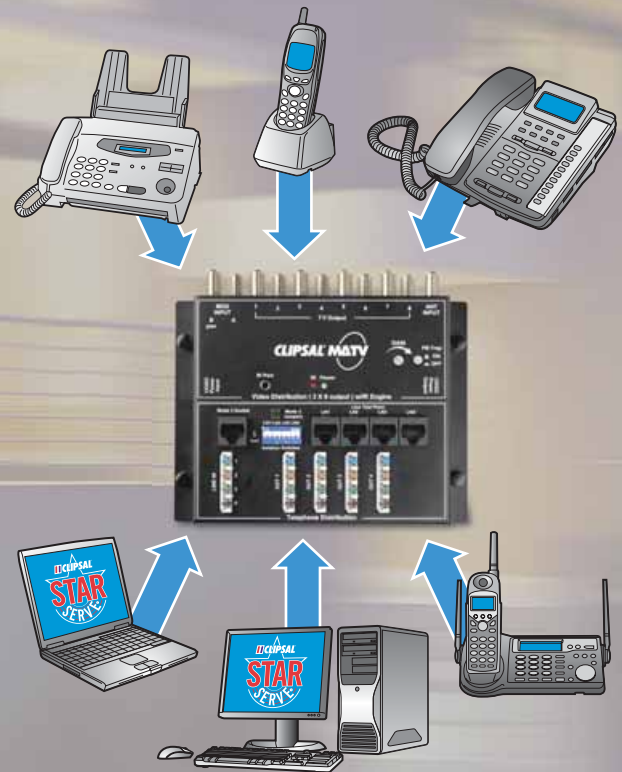

Like to
know more?

Refer to **The Builders and Renovators Digital Services Planner** for more information about planning for digital TV in the future.

...and create a
**phone and
data solution**
quickly and easily.

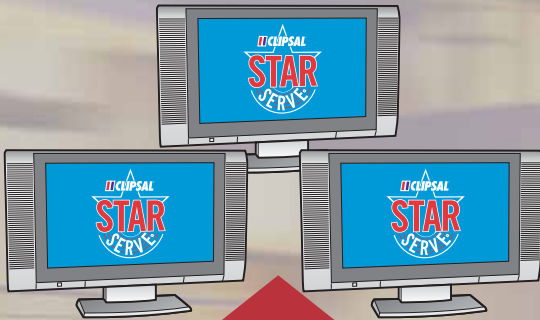

Clipsal StarServe® allows you to create a
computer network and multiple phone outlets.

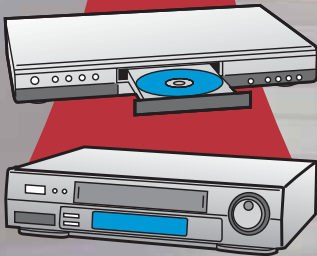

Watch
what you want,
when you want,
where you want...
